Solar Gun is an FPS puzzle game with some shooting mechanics.

You know what this means...

it takes a lot of inspiration from Portal and various other indie puzzle games, both in world design, art style and puzzle design. There are some visuals from 2001: A Space Odyssey for some reason. Using monolith imagery should make some kind of sense, otherwise it's just a reference that doesn't mean anything.

The puzzles are typical, not exactly mind blowing, but they keep you occupied for a few minutes/hours. The environments aren't quite illogical, but the attempt at worldbuilding is commendable.. This is one of those games that you either love or hate.. Not really sure what prompted all of the negative reviews, its a fun little puzzle thing if not a little overwhelming at times.. lame, insanely hard, even in EASY mode, redundant and waaaaaay behind a bomberman in terms of fun and excitement.

Brawl's universe is original, though extremely redundant again : everything's grey and dark, cold and static.

And to be honest, it doesn't worth its price at all. I got it in sales (50%) at 7,50€ and I still feel screwed, good we can get refunded.. In this game you only have to survive for 50 years.. well if you think that's easy, think again lol.

I love how simple this game is and I really enjoy playing it. I look forward to further improvements since its still on early access.

P.S. got this with a 75% off coupon.

. high frame rate + good environments, good animations, needs other gameplay bugs fixed

will try out battle royale launch next month. I played the second part and decided to buy the first, good games, I like the atmosphere of loneliness and this terrible music. If the third part came out, I would buy

Other game I had contact in my childhood. This was my second PopCap game and it is other great puzzle game. Although it was heavily inspired in Puzzle Loop I really like PopCap's version. The goal is to control a (stone?) frog that sends coloured balls to destroy others of the same colour, and all of this to free a god from a spell and be accepted among them. It is fun and addictive, but it is a really difficult game. The Adventure mode gets progressively hard by adding more colours, harder maps and reaching "Zuma!" takes longer. Be prepared for frustration after you clear the first two temples! Then there is the Gauntlet mode where it works as a survival mode and you try to break your own records as soon as you unlock more maps. And sadly it is all what Zuma Deluxe offers so expect repetitiveness. If you enjoy a casual puzzle game but yet challenging, Zuma Deluxe is worth a trial.. best game ever way better then csgo. pretty much dota 2 but with more characters 9\11. This game is so bad that I can't fit all the complaints in one review... This is the reason children should not be able to publish Unity games on Steam.. The visual representation and the game plot are very clever. This game was a pleasant surprise with remarkable good controls and game progression. A very funny 2D platform game experiment.. Dear Vural and Christian

I like the game, so funny. This is better than the best one. Thanks a lot. I hope this beauty will continue.. After playing this game, i lost my virginity 6 times to my dad

11/10. it's not the best racing game but not the worst either.  
pure arcade, crappy handling and mediocre graphics.

i will blame the devs for an idiotic design decision on the menu colors though - i never know whether yellow or white text marks the selection, mostly 2-choice selections won't help either.. Great game ... Very addictive
